

RSA mini research

Write a two- page summary (500 – 600 words) on a recent topic related to RSA cryptography. The topic could include but not be limited to: vulnerabilities, types of attacks (choose one), complexity of the algorithm, algorithm security, applications.

Submit the summary by email no later than next Monday April 30th 11:59 pm. Include your reference(s).

You may work individually (groups of two or three maximum are preferred).
